

# colofer® HOME REVERSE

### Convincing features

- » Backing coat
- » Excellent foam adhesion
- » Supports forming processes

#### Typical applications

Reverse surfaces

- » Washing machines and dryers
- » Refrigerators and dishwashers
- » Kitchen extractor hoods

Premium quality with reduced carbon footprint

| Properties  | Testing standard/Inspection requirement | Typical values  |
|---|---|---|
| Coating thickness                                 | EN 13523-1                              | ≥ 6 µm  |
| Color   | ISO 3668 / EN 13523-3                   | Gold glazed, other color shades upon request                |
| Surface appearance                                | -                                       | Smooth  |
| Design  | -                                       | -   |
| Gloss (60°)                                       | EN 13523-2                              | Suitable for top coatings                                   |
| Adhesion (cross cut)                              | EN ISO 2409                             | -   |
| Adhesion after bending                            | EN 13523-7                              | ≤ 2.0 T crack-free 1)                                       |
| Crack formation after bending                     | EN 13523-7                              | -   |
| Scratch resistance                                | Based on EN 13523-12                    | -   |
| Resistance to solvents (MEK)                      | EN 13523-11                             | -   |
| Resistance to rapid deformation (Impact test)     | EN 13523-5                              | -   |
| Corrosion resistance<br>» Salt spray test         | EN 13523-8                              | -   |
| Resistance to humidity » Continuous humidity test | EN 13523-25                             | Test duration: 500 h<br>No formation of blisters on surface |
| Recommended processing temperature                | -                                       | +20°C to +40°C  |
| Properties  | -                                       | Suitable for foams  |
| Environmental impact                              | -                                       | RoHS-compliant  |

All testing standards are the most recent version as long as a year is not indicated.

## OUR PATH TO A GREENER FUTURE

#### Premium products in the greentec steel Edition

With greentec steel, voestalpine is pursuing an ambitious step-by-step plan in the long-term decarbonization of steel production. The declared objective is to achieve carbon-neutral production by 2050, and the initial steps have already been taken. Process-optimized production operations already prevent up to 10% of the direct  $\mathrm{CO}_2$  emissions at the Linz site. The material and processing properties of the steel are not affected in any way in this production route. Each voestalpine steel strip product is available in premium quality in the greentec steel Edition with a reduced carbon footprint and unique benefits.

Premium quality with reduced carbon footprint

colofer®

Organic-coated steel strip – greentec steel Edition

Max. carbon footprint 2.23 kg  $\rm CO_2e$  per kg of steel  $^{1)}$ 

<sup>1)</sup> per EN 15804+A2 (EPD methodology) cradle to gate

All products, dimensions and steel grades listed in each voestalpine supply range are available as greentec steel Edition.

All values reflect the current status of our experience and knowledge. Slight deviations may occur as a result of specific color and sheet thickness. Paper printouts cannot be updated on a regular basis. For this reason, please refer to the most recent version of the online data sheets found on our home page (www.voestalpine.com/colofer).
