

# CUTTER BOWL

Perfection and precision in every turn

Highly efficient and reliable for your complete solution

Cutter Bowl factsheet EN| 08/2024

**Whether for meat or meat substitutes - the voestalpine Foundry Group's cutter bowls are convincing in all areas.**

Our steel castings offer the perfect solution for every weight class. They are characterised by extreme durability and can withstand even the toughest conditions. With decades of expertise, we guarantee maximum precision and quality at every stage of production.

## ADVANTAGES

### Efficiency Increase

- » Complete service - from the casting process to finishing
- » Use of the latest technologies

### Quality Improvement

- » Specially optimised materials
- » Highly precise and reliably reproducible castings

### Sustainability

- » Protect the environment through centralised production and minimisation of transport routes

## voestalpine Foundry Group

As an international player in the foundry industry, voestalpine Foundry Group, with its sites in Linz (AUT), Traisen (AUT) and the joint venture in China, has made a name for itself worldwide.

With a broad portfolio of steel castings, including nickel-based alloys, it offers customized solutions in areas ranging from machinery to railway systems and energy. By using state-of-the-art technologies an increasingly focusing on climate-friendly production processes, voestalpine Foundry Group is the first choice for cast products of the highest quality.
