voestalpine Specialty Metals delivers a wide range of high performance cost effective alloys for the oil and gas industry.

In addition to quality materials, we provide value added manufacturing to help our customers reduce costs and save money.

At voestalpine Specialty Metals, service is a priority; without you, the customer, we don't have a business.

Value Added Services

- Sawing
- Kitting
- Drilling
- Honing
- Trepanning
- Straightening
- Metallurgical support

We are where our customers are, being present at all hot spots of the oil and gas industry. Running 150 distribution sites on all 5 continents with more than 90 storage facilities, we are a partner who is always near all over the world. Our hubs are warehouses tailor-made for the oil and gas industry, located in Houston/USA, Singapore, the United Kingdom, Norway, and Brazil.

But we offer more than just good products delivered reliably and quickly. We also provide consulting and services from customized cuts to mechanical machining up to material testing, heat treatment and coating, thus creating an added value for our customers and saving effort, time, and cost.
